Total visual area: 105.64"w X 60"h
INSIDE CURVED PANEL:
Total graphic area: 468"w X 70"h
Total visual area: 458"w X 60"h

We recommend that the inside printed graphic be created as either a solid color or pattern for better finishing. All critical elements should be designed in the recommended safe areas as seen in gray on the template.

Please be sure to include the 5" bleed around the perimeter to compensate for the finishing of the graphics. Do not design any critical elements (text, logos, etc.) within 5" of the edge (see dotted lines).

General Artwork Guidelines
- cmyk color mode
- do not embed images; supply them
- resolution must be 100-120 ppi
- all fonts must be created to outlines
