## Step 1. Assemble the bottom of the frame

Using the 5MM HEX KEY, attach each PH-1168-L-L and both sides of the PH-567-L-L to the LN-FS-UPRIGHT's with the velcro facing front. Attach the opposite ends of the PH-1168-L-Ls to the PH-1067-L1 uprights using the 5MM HEX KEY. Once all are attached, use the 5MM HEX KEY to depress the IB2 lower button and insert into the top of the PH-1067-L1s, DO NOT LOCK.

## Step 2. Assemble the top of the frame

Make sure the velcro is facing towards the front and slide the left and right PM3O-1067s onto the LN-FS-UPRIGHT on the left and right ends of the frame. Push in the lock button to slide and attach the two PH-1067-L1s to the IB2s below, then lock both buttons. Attach PH-1168-L-Ls and the PH-567-L-L to the PM3O-1067s and PH-1067-L1s using the 5MM HEX KEY. The PM3O-CAPS come already attached to the PM3O-1067s.

**Step 3. Attach graphic support & adhere CKAPS for graphic headers/wings**  
 Snap attach the WME-1000 (graphic support) onto the frame inside the left and right uprights of the left, center, and right frame sections. Make sure the velcro is facing towards the front. Insert the 22 CKAPS into the outside perimeter channels and turn clockwise to lock, other locking screws should be loose. Evenly space out the standoffs for each header or wing.

**Step 4. Attach center graphic and graphic headers/wings**  
 Insert the panels into CKAPS 7mm wide channel, lock in the panels and tighten all of the screws. Velcro attach the LN-10X10-FG (left & right large center fabric graphics) and the LN-C-FG (center fabric graphic) to the frame starting at the top left corner. Continue to velcro attach the graphics to the frame ending in the bottom right corner.

**Step 5. Assemble tables & attach to backwall**

Slide the PHFC2-150-L into the underside of the table. Fasten the table legs to the underside of the table top using the 3MM HEX KEY. Lock in the tables leg support, PH-267-L-L, at a desired height. Once finished turn table over and attach it to the backwall frame (LN-FS-UPRIGHT) using the 5MM HEX KEY. Repeat for the second table.

**Step 6. Attach lights**

Slide the light fixture LUM-8 onto the light clip LN-LT-FXT. Lift and rest light clip onto top of horizontal channel and run the wires in between and behind the panels.
